Thetford Fresh Water Tank Sanitizer - Directions for Use

Step 1 - Cleaner (Blue Bottle)

1. Empty tank and add 1 oz of concentrated Detergent to the fresh water tank for every 4 gallons of tank capacity. (For a 40-gallon fresh water tank, add 10 fl oz of Detergent.)
2. Fill the tank with water. Run diluted Detergent solution through each faucet, shower and water outlet for approximately 1 minute.
3. Empty the tank.
4. Flush the tank and faucet lines by filling with clear water, running water through the lines and draining.
5. Proceed to Step 2 - Sanitizer

Step 2 - Sanitizer (White Bottle)

1. Shut off incoming water line.
2. Units/tanks must be washed with a compatible detergent and rinsed with potable water before sanitizing.
3. Prepare a solution of 2 ounces of sanitizer per 8 gallons of water (200 pp, active quaternary).
4. Apply or circulate (if possible) to all wet surfaces and allow a minimum contact of 60 seconds.
5. Drain the unit
6. Return to service by opening incoming water lines.
